

INVITATION

7. International NEXT Façade Summit:

Think Globally,
Build Locally

Tuesday, November 21, 2023
at 4:00 p.m. (CET) as a livestream event

How can future-oriented building envelopes and outstanding facade concepts be planned and implemented in an international context? We are very pleased to be able to present this time an extraordinary set-up of speakers with four women in our traditionally male-dominated industry:

Michelle Bacellar is Technical Director and facade specialist at Meinhardt Facade Technology (Dubai). The internationally active consulting firm for facade design and technology has branches in Asia, Europe and Australia and has made a name for itself especially in the Middle East with impressive high-tech buildings.

Jasna Moritz is Partner and Member of the Executive Board at kadawittfeldarchitektur (Aachen), reports on outstanding projects by the multi-award-winning firm and also introduces the philosophy of "working in dialogue". This means finding a customized solution together with all project participants.

Viktorija Millentrup is Architect and Design Lead at Bjarke Ingels Group (BIG) in Copenhagen. The internationally active architecture firm continues to inspire the world with visionary designs and places a strong focus on sustainability and social responsibility in its projects.

Susanne Stolper is Associate Director at Arup in Berlin and heads the German Building Envelope Design Team of the internationally renowned planning and consulting company. Technical excellence, visionary thinking, innovative strength and sustainability are the building blocks of success.
